VERTICAL FORM-FILL-SEAL MACHINE WITH SERVO AUGER FILLER

Salient features :

Packing Machine :

- Vertical form-fill-seal type packing machine for producing center sealed pillow pouches
- Rubberised draw-off belt mechanism for film transport.
- Pneumatically operated center & cross sealing jaws.
- PLC controlled machine.
- Printmark scanner for running panel printed films.
- Can handle variety of heat seable packing material such as PET/Poly, Foil/Poly, BOPP/Poly, LDPE etc.

Optional :

- Perforation system to produce chain of pouches.
- Inert gas flushing system.
- Online printing of batch number, date, etc.

Models :

- BD-100 : up to 100-mm bag width & 80 bpm
- BD-140 : up to 140-mm bag width & 65 bpm
- BD-200 : up to 200-mm bag width & 55 bpm
- BD-250 : up to 250-mm bag width & 50 bpm
- BD-400 : up to 400-mm bag width & 40 bpm

Auger Filler :

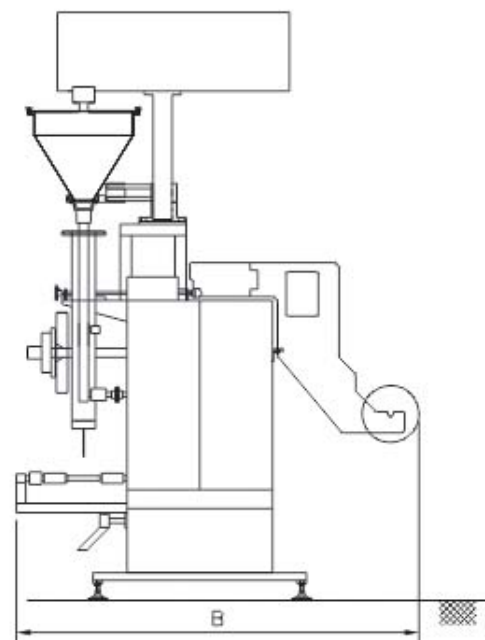

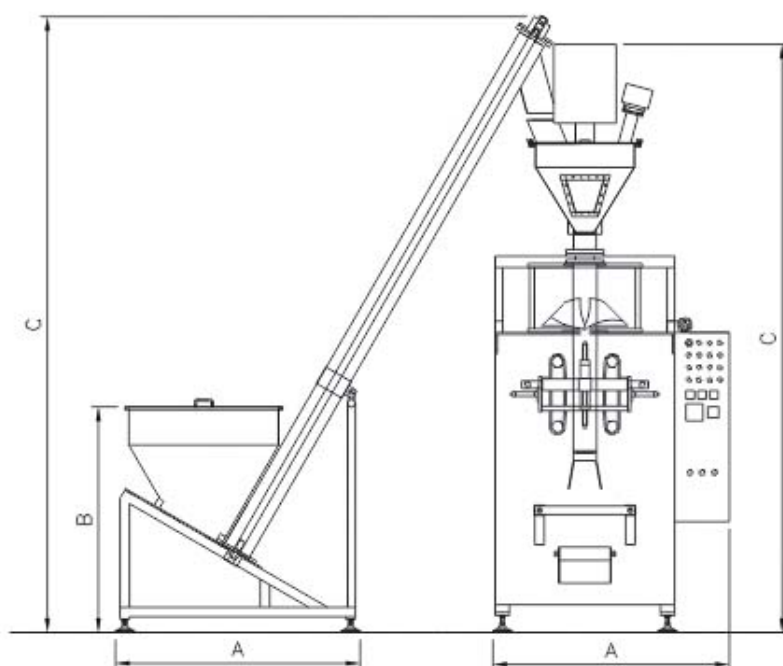

- Volumetric filling machine.
- Works on screw conveyor principle.
- Suitable for filling powders like spices, coffee, wheat flour, milk powder, agro-chemicals etc.
- With servo motor drive for controlling auger screw movement.
- Easy interface with packing machine.
- High precision & assured repeat accuracies.
- Product contact parts in SS-304.
- With agitator for breaking product lumps.

Optional :

- Electro-magnetic clutch brake instead of servo drive.
- Weigh feedback & control mechanism to take care of product density variations.

This machine is also available in Twin Head Model
